

ITSC User Guide

Title:	How to connect SSLVPN (Android)
Description:	This guide describes how to use “FortiClient” to connect SSLVPN in Android version 4.4.3 or above. In doing so, your Android devices may connect into our campus network via VPN, and you will be able to access campus applications and library resources as if you are on campus.

Background

HSUHK is offering SSLVPN service to staff and students. It is found that staff/student may need to disable IPv6 in their Windows Computer to work with SSLVPN.

Steps		Screens
1.	Install “ FortiClient ” from google play store	
2.	Run the Application	

3. Fill in the profile information.

VPN name: **HSUHK**
VPN Type: **SSL VPN**

Click ” **Create**”

The screenshot shows the FortiClient VPN mobile application interface. At the top, the status bar displays the time as 4:25 PM, signal strength, Wi-Fi, and battery level at 39%. The app header includes the FortiClient VPN logo and a menu icon. The main screen is titled 'Add VPN' and features a text input field containing 'HSUHK'. Below this is a 'VPN TYPE' section with two radio button options: 'SSL VPN' (which is selected) and 'IPsec VPN'. A blue 'Create' button is positioned at the bottom of the form.

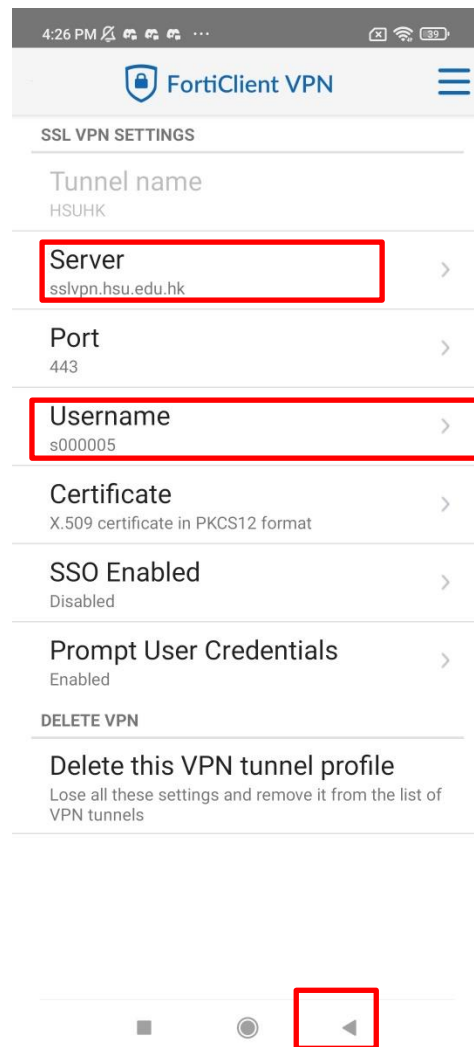

4. Fill in the profile information:

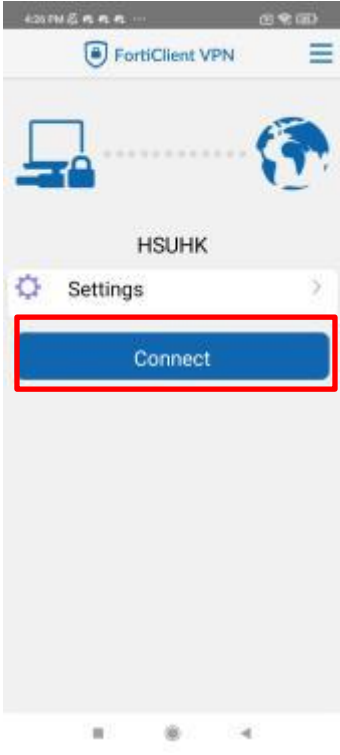

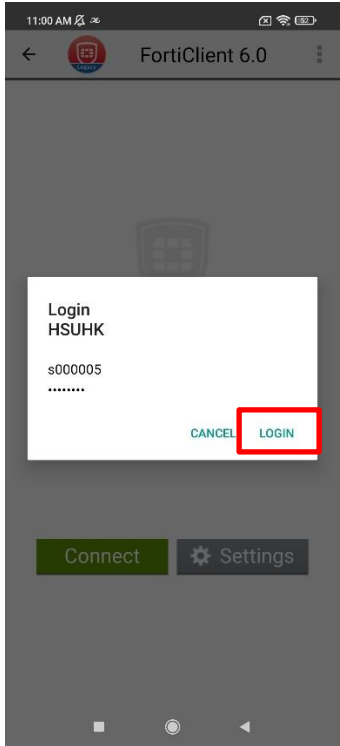

Host sslvpn.hsu.edu.hk

User MyHSU account username
(Student ID for student)
(E.g. S000005)

Click return.

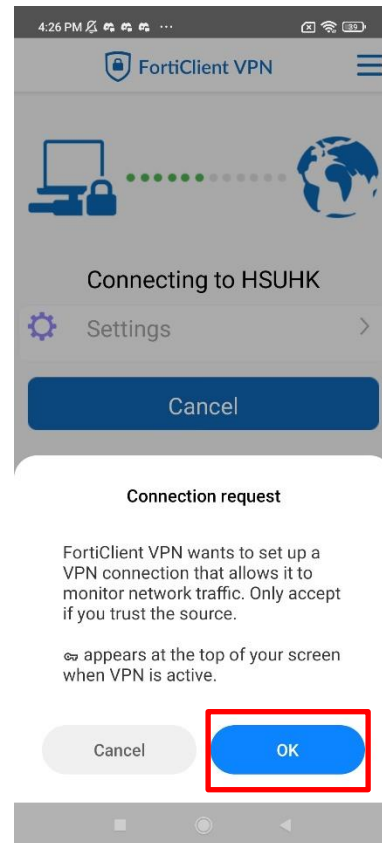

<p>5. Click “Connect”</p>	 <p>The screenshot shows the FortiClient VPN application interface. At the top, it displays 'FortiClient VPN' and a signal strength indicator. Below this, there is a status bar showing 'HSUHK'. A 'Settings' option is visible with a gear icon. The 'Connect' button is prominently displayed in blue and is highlighted with a red rectangular border.</p>
<p>6. Enter your MyHSU account password. Click “LOGIN”</p>	 <p>The screenshot shows the FortiClient 6.0 application interface. A login dialog box is displayed in the center, titled 'Login HSUHK'. It contains a password field with the text 's000005' and a series of dots. Below the password field, there are two buttons: 'CANCEL' and 'LOGIN'. The 'LOGIN' button is highlighted with a red rectangular border. At the bottom of the screen, there are 'Connect' and 'Settings' buttons.</p>

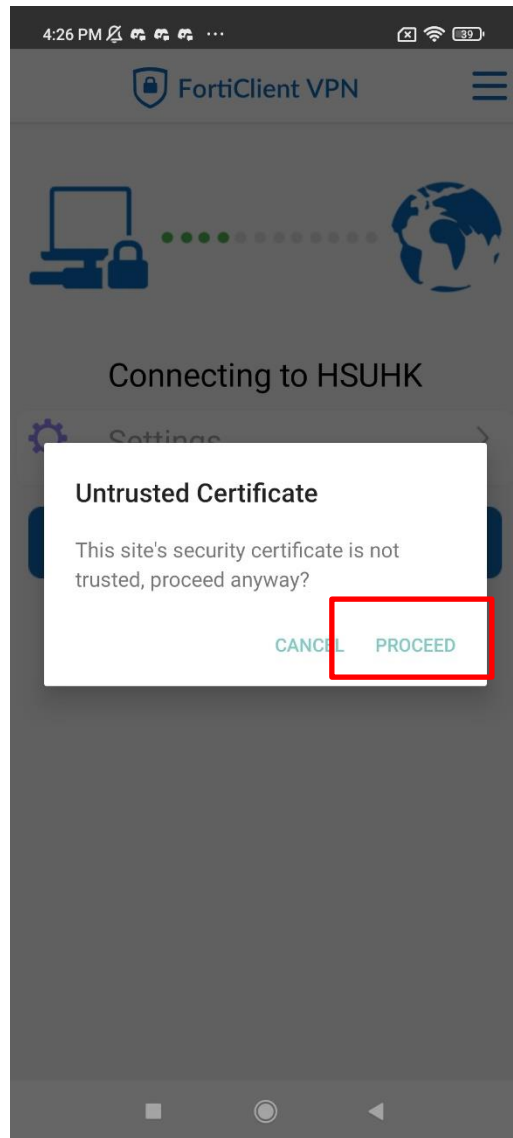

7. Click “OK”

8. Click **“Proceed”**

9. SSLVPN successfully connected,
Click "**Disconnect**" to disconnect SSLVPN
